# WALLMATE FLUSH

## Flush In-Wall Flat Panel Mounting System for ADA Compliance

### FOR DISPLAYS LARGER THAN 65″ AND UP TO 325 LBS

Wallmate Flush integrates the back box, display mounting plate, and AV device mounting into one complete system while maintaining a flush display-to-wall profile. This system is ideal for panels over 65″, including new 86" and 98" panels that are 3.8" thick, that need to achieve ADA compliance.

– Closes to as low as 0.0" to 0.12" from the wall. The X-Arms have been redesigned to enable a flush closure.

– Manufactured with 11 to 14-gauge steel, in the USA, to create a rigid mount that will remain stable and level.

– Only simple tools such as a drill, screwdriver, and Allen key are needed to install the system.

– Mounts directly to studs which eliminates the need for surface blocking. Contractors can install the back box during the construction phase.

*New* ADA mounting plate is custom made to mount specific 65 in.[+] panels. The panel can be mounted portrait or landscape.

*New* Slim X-ARM system makes the display seem feather light enabling easy and safe service and setup access.

*New* Flush back box has been redesigned to enclose the x-arms completely to enable flush closure.

Rapid deployment quick-remove peripheral plates enable faster and more reliable roll outs by faciliating AV equipment to be pre-dressed, and pre-tested.

Peripheral storage space makes it easy to mount AV gear behind the display while still remaining flush against the wall.

Included electrical knock outs for conduit and single gang boxes removes coordination of box locations when a display size changes.
## Wallmate 32MAXBF-XMS-ADA Product Specifications

| | |
|---|---|
| **Minimum Landscape and Portrait Panel Size** | 65″ and up |
