WALLMATE 32MAXB

In-Wall Flat Panel Mounting System
FOR DISPLAYS UP TO 350 LBS

Wallmate 32MAXB integrates the back box, display mounting plate, and AV device mounting into one complete system while maintaining a thin display-to-wall profile.

– Thin wall to display profile helps achieve ADA compliance.

– Manufactured with 11 to 14-gauge steel in the USA to create a rigid mount that will remain stable and level.

– Only simple tools such as a drill, screwdriver, and Allen key are needed to mount the system.

Ample peripheral storage space in the back box makes it easy to mount all the essential AV gear behind the display.

Peripheral device plates can be pre-dressed and AV equipment pre-tested to rapidly deploy dozens of displays.

Back box mounts directly to studs which eliminates the need for surface blocking. Contractors can install the back box during the construction phase.

Included electrical knock outs for conduit and single gang boxes enables easier installation details and removes coordination of box locations when a display size changes.

Universal mounting plate mounts most displays with non-standard VESA patterns without custom components or a complex installation process.

X-ARM system makes the display feather-light and easy for the end-user to easily pull and push the display to access the rear equipment.

Wallmate 32MAXB Specifications

Wallmate 32MAXB Kit with Universal Mounting Plate (as shown in images)

|	
Min. Landscape Panel Size	65"
XARM Opening Distance (wall to back of display)	16"
