

SLIM LED

Unified Wall Mount Slim

FOR ALL SOLID LED TILES

RP Visuals Slim LED mounting system is a unified wall mount LED system that enables long term stability while maintaining an ultra low profile enabling ADA mounting.

- Ultra thin profile helps achieve ADA compliance
- Manufactured using 11 gauge welded sections for long term stability.
- Enables an optically perfect gapless joint between tiles by incorporating micro z-axis adjust per array plate allowing adjust without compromising the X or Y axis
- Made to order to match the LED tile size and technology.
- Proprietary dual plane design transforms the system into an effective overall composite structure creating an ultra thin mounting system that is superior in rigidity and strength.

Slim LED Specifications

Depth wall to back of LED tile	0.85" - 1.3" typical (design adjustable)
Adjust range	0.5" typical (design adjustable)
Recommended Max image size W x H	28' x 7'
LED Tile models	Most LED tiles
