

WALLMATE B6

In-Wall Flat Panel Mounting System

FOR DISPLAYS UP TO 425 LBS*¹⁰

The Wallmate 32MAXB6 with the Large Display Universal mount, UNV-158, is a double stud bay system designed to hold almost every flat panel display above 85", while maintaining a low profile from the wall and position adjustment.

- X-arm has been redesigned to enable close as low as 1.78".
- Manufactured with 11 to 14-gauge steel to create a rigid mount that will remain stable and level.
- Installation only requires simple tools such as a drill, screwdriver, and Allen key.

Peripheral storage space makes it easy to mount AV gear behind the display while still remaining flush against the wall.

Rapid deployment quick-remove peripheral plates enable faster and more reliable roll outs by facilitating AV equipment being pre-dressed, and pre-tested.

B6 back box has been designed from the ground up to support heavy weight loads.

Includes electrical knock outs for conduit and single gang boxes.

UNV-158 mounting interface supports multiple makes and models. Example show is for an offset 1700mm x 800mm mount patterns.

New Unique proprietary roller X-arm allows exceptionally smooth and easy operation under high weight loads.
